PROJECTS

Disrupt'Campus (full-stack web developper)

National Veterinary School of Toulouse

Nov 2019 – Ongoing France, Toulouse

- Collaborate with law students on a **responsive** web application for a veterinary school to help them track and compare farmers according to Welfare Quality Protocol.
- **Bootstrap** templates (html/css/js) to speed-up the front-end development process
- **Node.js** framework for server-side javascript development
- Planning to use **MongoDB** as a DB technology because of particular user's need (uploading and using csv, jpg, json...)
- **Data** mining with **Weka** then **Python** for predicting whether a farmer will have sanitation issues in the next few years

Twitter data mining

University

Nov-2019 France, Toulouse

- Python script using **Twitter API** to search for twitts and then classify them with classifiers such as random forest or K-nearest neighbours

Java game with MVC pattern

University

Oct-2019 France, Toulouse

- Lottery game with different features conceived as a desktop application using **Swing**

Online bill generator

Personal

Sept-2019 France, Toulouse

- Java web application : Html form powered by Jetty http server and servlets to produce a request-response (the bill)
